One of a series of Solutions from Softbox

Care Leavers... the Software

Care Leaver and Through Care Payments is one of the four Child Care Payment modules, which together provide a complete solution for all Child Care needs.

Care Leaver and Through Care Payments module has been designed as a comprehensive solution to the payment of allowances to Care Leavers and Through Care Clients. Detailed information on clients includes:

- Full personal details
- Bank Account details for direct payments
- Creditor reference details for linking to corporate creditors
- Detailed payment schedule for all regular payments

This client group in particular, needs a payments module that can be flexible. The Softbox Care Leavers and Through Care solution provides just such flexibility. Any payment made though the application can be paid:

- Direct to the Client
- To any Third Party
- Payable by BACS, Cheque or Cash

In addition to the regular weekly payments the Care Leaver and Through Care Payments module handles all single or one-off payments, including those payments which form part of a Leaving Care or Setting Up Home Grant. Each client can have a designated 'budget' and the application will monitor expenditure against that figure.

Throughout the application all expenditure has Budget Codes recorded against it, so that at the beginning of each week, when the weekly payments are made, this information is transferred to the corporate general ledger and service budgets are updated with the expenditure. This weekly process includes:

- Checking individual payment amounts
- Authorising payments
- Producing information for creditors system
- Remittance advice letters
- Summary reports

Reports

A comprehensive range of reports are provided to give essential budget monitoring information. In addition we provide a 'Quick Query' facility which gives users the option of extracting data and the data can also be accessed using popular third party report writing tools such as Business Objects and Crystal Reports.

Care Leavers.... *Beyond the Software*

Implementation

The achievement of a successful implementation of any project depends greatly upon a number of factors; staff awareness, effective procedures and effective software. We at SoftBox have proven implementation plans and procedures that will ensure the success of any project.

Training

We offer a wide range of courses designed for end-users, managers and administrators implementing any of our products. Due to the specialist nature of our software applications, we are able to offer unrivalled expertise and knowledge of these systems. All Softbox trainers have personal expertise in a technical role and are able to offer 'hands-on' experience to delegates, who will be working with the software application on an everyday basis.

Support

We at Softbox offer a complete range of computer products and services

- Software design
- Software installation
- Consultancy
- Training
- Technical support
